

Lynx Presence 15

The Lynx Presence 15 is a tactical rifle designed to be smooth, fast, reliable and accurate even in the hardest of environments. The rifle is based on an enhanced evolution of our patented Lynx CrossBolt straight pull system, which is known as one of the smoothest actions on the market.

The rifle is manufactured in Finland without any compromise accepted throughout the manufacturing process. Through relentless focus on performance and quality, including using selected barrels from german Lothar Walther, we achieve an accuracy of 1/2 MOA.

To facilitate suitability for various tactical scenarios, the rifle uses AR15 compatible parts and AICS compatible magazines. Surface coating options preventing visibility through thermal cameras are available.

To have a presence, you need the Lynx Presence 15.

Technical Specifications

Calibers	6,5 x 47 Lapua .308 Winchester Subsonic .308 Winchester				
	Description	Material	Finish	Dimensions	Data
Rifle	Straight pull
